

IDENTI-CRYER LOCKDOWN CONTROL PANEL

The Identi-Cryer Lockdown Control panel is designed to help create a notification system in the event of an emergency situation within a building; these emergency situations can relate to any instances in and around the building which require building occupants to carry out a Lockdown procedure.

The panel is continuously monitoring for faults 24 hours a day and has the facility for 24 hours battery standby in the event of power failures.

Any Lockdown incident will be triggered via the use of call points which will be signalled to the control panel giving audible voice and visual alarms.

The Lockdown system comprises of 3 basic components, call points, control panel and voice enhanced sounders.

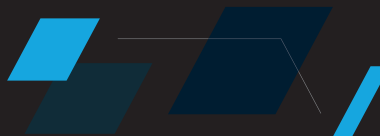

Specification
