# IDENTI CRYER®

Vimpex Identi-Cryer® Voice Sounders, with their innovative design, offer a highly effective solution for emergency evacuation and lockdown procedures in schools, colleges and universities, as well as other public buildings.

Identi-Cryer systems can integrate with existing fire alarm systems reducing the need for extra wiring by interfacing with the existing fire panel.

Identi-Cryer can be fully integrated into any fire alarm system whether conventional or addressable. This allows for fire, class change, lockdown and many other messages to also be fully broadcast via the existing fire alarm system – avoiding confusion by broadcasting clear, pre-recorded messages specific to the type of emergency incident.

After 15 years of successful manufacture and supply of voice sounders for enhancement to fire safety systems, Vimpex now apply our expertise to notification of Lockdown alarms.

Since the introduction of the Terrorism (Protection of Premises) Act 2023, any building likely to house more than 100 members of the public will be advised to have systems and protocols in place to mitigate the risk of violent attack. It is recommended by safety managers that part of a Lockdown Protocol should include clear notification to staff and building users as to the course of action they should take in case of attack.

#### Buildings which would benefit from a Lockdown Alarm include:

- ⚠ Schools / Colleges / Universities
- ⚠ Dance clubs
- ⚠ Scout & Guide facilities
- ⚠ Youth Clubs
- ⚠ Museums and Galleries
- ⚠ Night-time entertainment venues

It is important in lockdown scenarios that the alarm is not confused with the standard fire alarm tone. Identi-Cryer Multi-Message Voice Alarm Systems avoid confusion between fire and evacuation and lockdown instructions.

### Benefits of Voice Messaging

Multi-Message Identi-Cryer Lockdown sounders can offer full or partial lockdown instruction, coded or 'staff-only' messages and other non-fire instructions.

Identi-Cryer is extremely versatile. Able to be implemented as a stand-alone system or fully integrated with new or existing fire alarm systems.

Clear messaging, not to be confused with Fire Alarm System.

Offers a highly effective solution for emergency evacuation procedures in settings with individuals with sensory sensitivities.

**VIMPEX**

We can offer a full Lockdown system with Control Panel, Call Points, Sounders and Mobile communicator to give notification to teachers/staff.

**Our system consists of:**

- / Specific Identi-Cryer Lockdown Panel.
- / Blue Emergency Alarm Call Points with protective covers to reduce risk of tampering, misuse or accidental damage.
- / Remote diallers for instant staff notification via laptops, phones and tablets.

This group of products can provide building managers with an excellent solution for lockdown notification requirements and clear, unambiguous messaging to staff and other building occupants – supporting lockdown protocols.

Installation of Identi-Cryer Lockdown systems is easy. Any professional fire alarm or security system contractor will be familiar with the method of installation and system configuration.

A full lockdown is in operation

## Identi-Cryer Voice Sounder

### FEATURES

- High Sound Output - 100 dB(A)
- Optional integral blue strobe
- Low current consumption - average 20 mA
- No special wiring, easily retro-fitted
- Fully synchronised over multi-zones

## Voice Message Controller

### FEATURES

- Uses conventional sounder circuits/NACs
- All sounders & strobes fully synchronised
- Keypad IMCs have a green status LED
- Any state of alarm can be broadcast
- Up to 7 messages

## SmartGuard with Call Point

### FEATURES

- Blue now commonly associated for lockdowns
- Optional Sounder
- Prevents misuse and accidental damage
- Customisable label
- Kit combining Call Point and SmartGuard

## Mobile Communicator

### FEATURES

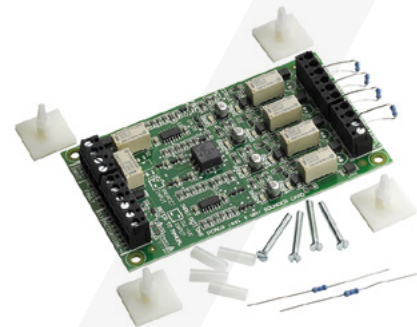

- Instant notification of alarm or fault delivered to mobile phones
- Multiple users on one account
- Customisable messages for alarm
- Supplied with 2 year subscription
- Easy connections to panel

## Emergency Notification Control

### FEATURES

- Emergency Notification System Panel
- 2, 4 and 8 zone panels
- Simple to install and maintain
- Up to 72 hour battery standby
- Fault & alarm relay contacts available

## Sounder Splitters

### FEATURES

- Turns 1 sounder circuit into 4
- Simple installation
- Can be fitted neatly inside Message Controller or Notification Control Panel
