

Two-way radio keypad

Compatible with the Scantronic and i-on range (excluding Compact), Eaton's two-way KEY-2R-KPZ keypad learns directly into SSR panels with built in radio (80HE/30R) or via EXP-2R radio expander enabling tidier wire-free installations

Featuring two-way radio, the KEY-2R-KPZ keypad offers the same functionality as a wired keypad. At the same time, it allows you – and your customer – welcome flexibility when it comes to choosing the optimum location.

Scantronic Secure Radio (SSR) products feature advanced two-way communication and true signal encryption, ensuring market leading cybersecurity comes as standard. Over-the-air updates keep devices future-proof and reduce labour time onsite, whilst shortened device response times improve battery life and ensure rapid event notification, minimising false alarms.

At a glance...

- Radio keypad, giving full access to configure, set or unset the system
- Learns directly into SSR panel or expander
- Easy installation
- Two wired zones
- Internal proximity reader
- Backlit display and keys
- Navigation keys for installer and user menus, with built-in alert LEDs
- Cybersecure, encrypted SSR communication
- Backwards compatible with all legacy Scantronic radio products
- A, B, C, D setting keys, with built-in status LEDs. An engineer can configure the keys to set individual wards, partitions or part-sets, or to control outputs.

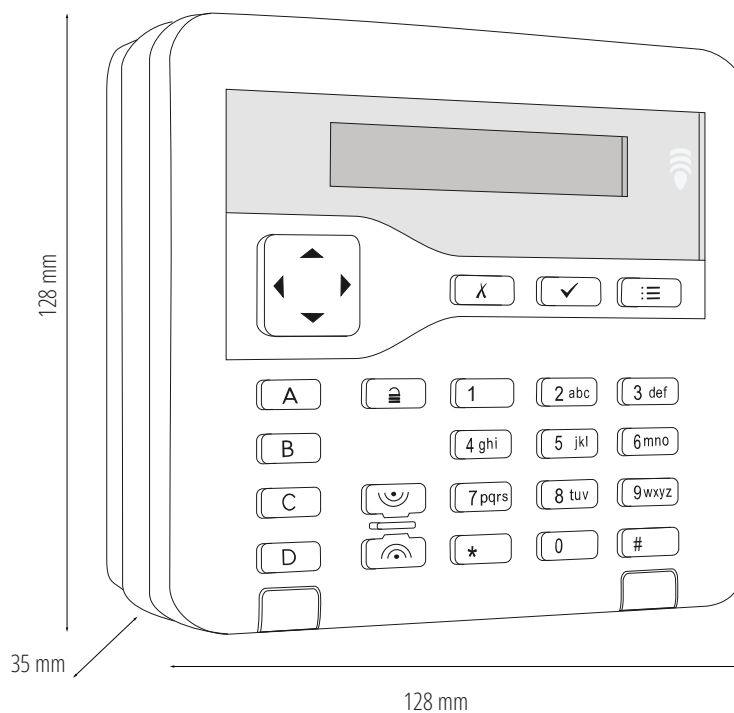

Powering Business Worldwide

Scantronic product data sheet

Product specification

Product code	KEY-2R-KPZ
Zone inputs	2
EN 50131 grade	2
Environmental class	2
Compliance with EU Radio Equipment Directive (RED)	Compliant
Operating temperature (°C)	-10°C to +55°C
Zones	2
Radio frequency	868-868.5MHz (SSR mode) 868.6625MHz (Legacy mode)
Transmission range	700 max. in free space
Battery type	3 x 1.5Vdc AA
Weight	300g (with batteries)
Dimensions	128mm (h) x 128mm (w) x 35mm (d)
